# Student Profile and Related Data

## A COMPLETE STUDENT PROFILE

See everything related to the student directly on the profile. **Flashpoint's** approach to managing large volumes of information for each student is fast, neat and effective. Find a complete OJT history, class history, notes, related documents and much more. Our approach maintains an organized and tidy view while providing easy access to all member related content.

Company: A & D Steel Equipment, Inc.
11-35 31st Drive
Long Island City, NY 11106
(718) 728-4100 (Work)

## OJT & UPGRADES

Students can enter OJT directly from their smart phones. Sophisticated reports allow for in depth analysis of OJT by labor category, apprenticeship level, company and other related OJT fields. Upgrades are controlled and can be performed in batch to convert everyone in a class simultaneously. Letters for upgrade success and denial are built in. You'll find the data you need quickly and consistently time after time!

## CLASS MANAGEMENT

Manage all of the details regarding classroom activity. There is current support for assignments, attendance, grading, creating electronic tests and quizzes, document management, billing for classes, annual or semester based tuition, evaluations and so much more! Built in communication allows you to email, text or robo-call your students instantly---at any time. **FlashPoint** manages and holds detailed records regarding communication and changes to the student record.

## COMPLETE ACTION HISTORY

**FlashPoint** is capable of tracking a variety of data and storing it against the student's record. Our custom 'action history' is a compilation of numerous important items that can be viewed at a single glance. Printed reports can be archived against a student's record and in a queue for the person printing the record.

## Incredibly Smart Document Storage

### EASILY RELATE FILES WITH CONTENT

Documents and Files are linked easily with the member they support. Find the member and their documents easily accessible. There's no need to go off in some remote disconnected location to find files related to people. **FlashPoint's** approach is fast and intuitive! Additionally, our document storage feature allows for unlimited data storage against your existing student and member information. Put us to the test and see how we are rewriting the process of easy data access.

### SUPPORT FOR ALL FILE FORMATS

It really doesn't matter what file type you are talking about: **FlashPoint** supports them all! We don't place any limits on the size of the files either. Access all your documents securely from any location. Expose documents to members to simplify communication and minimize your workload. Store what you want, where you want, when you want to!

### SUPPORT FOR FOLDERS

Create folders and folders within folders. Organize documents for solid historical preservation and easy access in the future. Search and filter on documents to wade through hundreds, thousands, or more, quickly and accurately.

### FILE VERSIONING

Each recorded file allows for multi-versioning on a single document. Revert to an old version, or upload a new revision, at the touch of a button. Our goal is to make content management easy and simple, so your information will always be up-to-date. With **FlashPoint**, you're in complete control!
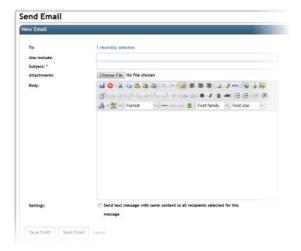

## Communicate Like Never Before

### COMMUNICATE COMPREHENSIVELY

With integrated email and texting, you're certain to get your message across quickly and efficiently! All communication is automatically tracked against the person's records. Administrators and instructors can send email messages with attachments to members and/or other personnel. Communicate with a class or designated groups instantaneously. Filter your members based on criteria and send texts (SMS) to get important messages delivered right away.

### TEXT MESSAGING IS BUILT RIGHT IN

Text messaging is built into **FlashPoint** so that people, irrespective of their role in the system, can be texted through their cell phone for immediate communication. You have the option to send a backup email with each text to ensure that communication occurs.

### EMAIL MEMBERS

**FlashPoint** contains embedded email functionality related to all people and/or companies that have email addresses. You can attach files and even schedule the time of delivery. **FlashPoint** makes it easier than ever to communicate with your member population!
